ALH Wiring Harness - Necessary Hardware | TDIClub Forums

Primary wire is typically an 18-gauge wire and is the most common wire found in wiring harnesses. The larger wires that feed heavy-draw circuits are typically 14- to 12-gauge. The wire in Painless Performance kits runs a little larger than the standard; the primary wires are 16-gauge, with 12-gauge for heavy-draw items such as the headlights.

...

An automotive wiring harness is an assembly of electrical cables that makes it possible for electrical devices to transmit current and signals. The wiring harness serves as a combination of circulatory and nervous systems for the car. Its wires carry electric currents to components that need power and transport data between electronic systems.
