Test Study Guide.

Carolus Linnaeus.

founded the science of.
taxonomy. Taxonomy:
is the science of
identifying, classifying
and naming of
organisms. Linnaeus
came up with the
system of binomial
nomenclature; the two
part naming system
that gives scientific
names to organisms.

Guide Answer Key

The broadest taxon is called the kingdom.

Linnaeus put all organisms into one of two kingdoms — Plantae or Animalia.

The other six taxa from broadest to most specific are — Phylum,

Class, Order, Family, Genus, & species. A

sentence to help remember these taxa is — “King Phillip Came Over For Gooseberry Soup.”

A dichotomous key is a written set of choices that leads to the name of an organism.

Scientists use these to identify unknown organisms. Consider the following animals. They are all related, but each is a separate species. Use the dichotomous key below to determine the species of each.
