DNA Questions - Analysis Questions 1 What base does ...

(Please note: answer the questions as you go through on the answer sheet.) The model includes the following components: • Cass: a DNA-cutting enzyme called a nuclease Guide RNA: an RNA molecule that binds to Cas9 and allows it to find the target gene Target DNA: a DNA molecule that contains a "target gene" for CRISPR-Cas9 to cut Random nucleotides: nucleotides that can be inserted where the target gene is cut Donor DNA: DNA that can be used to edit the target gene in a more specific way ...

"Tabs" Cas9 United States CCCAC DNA 1 Target DNA 1 ...

Two model templates are available. One is a full colour version showing how the DNA bases pair together. There is also a blank version where you can colour in the complementary bases yourself. DNA has a 'double helix' structure. Much like a spiral staircase, it has two single strands that join

and twist together.

Origami DNA | Activities | yourgenome.org

We will use paper plasmid DNA models to go through the process that scientists use when making recombinant DNA. Scissors will substitute for restriction enzymes. The enzyme DNA ligase, which forms phosphodiester bonds between pieces of DNA, is represented by Scotch tape. Our result will be a model of a recombinant DNA molecule.
