### Brief Description Of The Test Estimation

Process “Estimation is the process of finding an estimate, or approximation, which is a value that is usable for some purpose even if input data may be incomplete, uncertain, or unstable.”

**Software Project ...**

Presales teams need effort estimation in order to cost price custom software and project managers need it in order to allocate resources and time plan a project. Usually, software development is priced based on the person days, it requires in order to be built, multiplied by a daily person day rate.

Without effort
