How to Adjust a Front Derailleur - YouTube

Shimano Side-Swing front derailleur 6. MTB vs road FD. Shimano road and MTB FDs have different cable pull ratio - that is the amount of FD movement for each mm of cable movement. This means that MTB FDs might not work well with indexed road shifters and vice versa.

Compatibility [05] Front derailleurs | BikeGremlin

Shimano's "10-speed" triple front derailleurs are optimized for a 13 tooth difference, typically 52-39. Most other Shimano front triple derailleurs are optimized for a 10 tooth difference between middle and large ring. Surprisingly, the size of the "granny" chainring has little effect on derailer performance. Many cyclists customize their "road ...

All About Front Derailleurs - Sheldon Brown

A short history of the front derailleur. Early users of double chainsets didn't even bother with front derailleurs; they pushed the chain from the large to small chainring with their heels at the bottom of a long climb, then stopped at the top of the hill to manually lift it back to the big ring.

Is the front mech dead? Is there a future for the front ...

Lots of rear derailleur options - and the front derailleur ain't dead yet Shimano Deore M6100 RD-M6100-SGS rear derailleur. There is a single 12-speed rear derailleur option for Deore.
