228 A Fundamentals of Vector Analysis Besides the linear operations, we define the following two types of multiplication. The scalar product (dot product) between the two vectors, a and b , is defined as $a \cdot b = (a, b) = ab \cos \phi$, (A.4) where a and b represent absolute values of the vectors a and b , given by $a = |a|$ and $b = |b|$, and ϕ is the smallest angle between these vectors.
