Ask for players' emails to identify them. By enabling player identifier, you'll know the real person behind the nickname in your game. We'll track players' scores to their emails, names or another identifier of your choice.

Kahoot!

Carrier Strike Group 3 (CSG-3 or CARSTRKGRU 3) is a U.S. Navy carrier strike group. Carrier strike groups gain and maintain sea control as well as project naval airpower ashore. The aircraft carrier USS Abraham Lincoln (CVN-72) is the group's current flagship. Other units assigned include Carrier Air Wing Nine; the Ticonderoga-class cruisers USS Mobile Bay (CG-53) and USS Antietam (CG-54); and ...

Several antibodies are in use or under development as therapies to treat COVID-19. As new severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) variants emerge, it is important to predict whether they will remain susceptible to antibody treatment. Starr et al. used a yeast library that covers all mutations to the SARS-CoV-2 receptor-binding domain that do not strongly disrupt binding to ...

Prospective mapping of viral mutations that escape ...

Author summary Mutations can now be introduced into genes that code for RNAs and proteins almost at will. Yet why one mutation compromises the function of the molecule while another does not often remains unclear. This is, in part, because our main signposts for understanding the molecular basis of differential mutational effects—crystal structures—provide only very partial guidance.

Fitness landscape of a dynamic RNA structure

The limited number of lytic cells preclude a definitive answer to this question; however, we note that cells expressing each of the three heavy chain isotypes are observed within the lytic cluster in LCL 777 B95-8 at isotype frequencies roughly corresponding to those of the whole cell population (Figure 1—figure supplement 5).

Single-cell RNA-seq reveals transcriptomic heterogeneity ...

A key advantage of this model is that $\Delta yopM$ locally expands and induces gut inflammation but, unlike the *Y. pseudotuberculosis* (*Yptb*) wild-type, is completely cleared within a few days post-infection (Han et al., 2017). As such, this model allowed us to assess the impact of a transient infectious process on colonization resistance ...
